

Unlock IG Engagements

What is FileFacets?

FileFacets is an end-to-end solution that facilitates ROT processing, auto classification and, metadata mining and attribution. Unique to FileFacets is a reliable communication centre for enhanced collaboration and pre-deployment staging area. FileFacets' SaaS model makes it a cost-effective and easy to deploy solution.

Why FileFacets?

Many organizations are under intense pressure to improve their IG strategy, leading to increasingly demanding deliverables.

FileFacets will save you time – allowing you to take on more clients. The solution is reliable – ensuring you will deliver projects on time with optimal results. Satisfied customers lead to long-term relationships, more predictable income and an established reputation.

Do more in less time, expand your customer base, and increase profit margins, all with the FileFacets ECM solution.

Unlock IG engagements and discover more opportunities with FileFacets

Being an IG professional has its challenges – it's necessary to differentiate your services in a saturated market and difficult to create long-term customer relationships. Plus, there is always the balancing act of charging competitive rates while still maintaining a healthy margin on your work.

Leading IG professionals turn to FileFacets to increase customer satisfaction while they enhance their own capabilities.

FileFacets, a leading-edge ECM solution, will increase your ability to provide better, more timely services. It will allow you to take on more customers, and ultimately lead to larger profit margins and a better bottom line.

“With FileFacets, we were able to create brand new revenue streams out of existing customer engagements, creating more margin for our business.”
